

DNS Resolver Recommender

– Robert Richter

What will you learn?

- How to do proper DNS Measurements
- Coping with recording user data
- Web-assembly

Problem:

- Users don't have any idea of DNS and what choosing a resolver means
- Build a website that recommends a DNS resolver to a user (similar to what M-Lab does)
- We collect the data anonymously

Challenges:

- DNS Measurements from client's browser
- Respect DNS Caching
- Maintain list of DNS servers (3rd party?)
- Agreement on data collection

Test Your Speed

M-Lab's Speed Test provides advanced diagnostics of the performance of your broadband connection through quick measurements.

☒ I agree to the data policy, which includes retention and publication of IP addresses.

AGAIN C

We are temporarily running multiple tests back to back to calibrate new measurement protocols. This means results may take a little longer to appear than usual. Thank you for your help.

For more on M-Lab's data collection and measurement, including the disclosure of IP addresses, see our Privacy Policy.

Results

	NDT	MSAK
Test Server	Berlin, DE	Hamburg, DE
Download	486.00 Mb/s	195.89 Mb/s
Upload	406.62 Mb/s	492.73 Mb/s
Latency	19 ms	10 ms
Retransmission	0.98%	0.60%
